AirTies Launches a Wireless 'Set-top Box To Go'

New Portable IP/OTT STB is small enough to fit in your handbag

IBC, Amsterdam - AirTies Wireless Networks, a leading supplier of advanced wireless and OTT/IPTV technologies, will be showcasing in Hall 5 Stand B33 a portable wireless set-top box, small enough to fit into your handbag. **Measuring just 10x10cms**, the miniature STB attaches wirelessly to the IP gateway and can easily be moved from room to room. It features RF remote control and home automation capabilities to enable remote programming and is portable enough to take on holiday or to a neighbor's house to watch the football.

The combination of WiFi connectivity and the device's miniature form factor makes it a 'Set-top box To Go', allowing consumers to take their HD viewing experience with them to the next room or the next country. The STB wirelessly connects to the home gateway and works on any unmanaged internet connection, effectively unbundling the provision of the Pay TV service from the broadband service offering and opening up new revenue-stream opportunities.

The Air 7405 is a small OTT/IPTV STB and now available in trial quantities. It utilizes the latest Broadcom 7250 System-on-a-chip (SOC) chipset with 5K DMIPS CPU, an HEVC decoder plus AirTies' hallmark wireless video connectivity. The Air 7405 comes complete with built-in 2x2 802.11ac wireless connectivity, operating at 2.4 or 5GHz frequencies, together with its trademark AirTies [Mesh Technology](#), allowing consumer self-service installation and extending the wireless coverage to every corner of the house.

About AirTies

AirTies was founded in 2004 by a senior management and technical team from Silicon Valley, with the strategic intent to become the market leader for the wirelessly connected home. AirTies designs and develops its own software and hardware, wirelessly streaming high definition video to multiple rooms and screens. The comprehensive product portfolio includes broadband Internet devices and Internet based television set top boxes. Its award winning technology enables seamless wireless integration at the touch of a button, as well as 100 percent internet wireless coverage in homes.

AirTies has an install base of over 10 million devices worldwide. More information is available at www.airties.com
